

What is claimed is:

1. A container apparatus comprising:

5 a) an exterior form, with an outside and an inside, surrounding an
interior form with a compartment wherein said exterior form includes
at least one space for containing items on said inside and wherein
said compartment includes at least one space for containing
items; and

10 b) at least one opening in said interior form and at least one
opening in said exterior form.

2. The apparatus of claim 1 wherein element a) further includes at least one raised
element on said outside of said exterior form.

15 3. The apparatus of claim 1 wherein said interior form is offset from a center
location of said exterior form.

20 4. The apparatus of claim 1 wherein said at least one opening in said interior form
includes a funnel section for funneling items to said at least one opening in said
interior form.

5. The apparatus of claim 1 further comprising a removable cap for said at least one opening in said exterior form.

6. The apparatus of claim 5 wherein said removable cap is edible.

5

7. The apparatus of claim 1 wherein said items are edible.

8. The apparatus of claim 1 wherein said at least one opening in said interior form includes at least one flap limiting the size of said opening.

10

9. The apparatus of claim 1 wherein said at least one opening in said exterior form further includes an interior recess in combination with said interior form for receiving and retaining a removable cap.

15

10. The apparatus of claim 1 wherein said at least one opening in said exterior form comprises two openings.

11. The apparatus of claim 1 wherein said at least one opening in said interior form comprises two openings.

20

12. The apparatus of claim 1 wherein said at least one opening in said exterior form comprises two openings and wherein said at least one opening in said interior form comprises two openings.

5 13. An animal treat ball comprising:

a) a ball, with an outside and an inside, surrounding an interior form with a compartment wherein the ball includes at least one space for containing animal treats on the inside and wherein the compartment includes at least one space for containing animal treats; and

10 b) at least one opening in the interior form and at least one opening in the exterior form.

14. The apparatus of claim 13 wherein element a) further includes at least one at least partially circumferential raised element on the outside of the ball.

15

15. The apparatus of claim 13 further including a sinuous raised edge on the exterior of the ball.

16. The apparatus of claim 13 wherein the interior form is offset from a center
20 location of the ball.

17. The apparatus of claim 13 wherein the at least one opening in the interior form includes a funnel section for funneling items to the at least one opening in the interior form.

5 18. The apparatus of claim 13 further comprising a removable cap for the at least one opening in the exterior form.

19. The apparatus of claim 18 wherein the removable cap is edible.

10 20. The apparatus of claim 18 wherein the at least one opening in the interior form includes more than one flap limiting the size of the opening.

21. The apparatus of claim 18 wherein the removable cap is domed shaped.

15 22. An animal treat ball method comprising the steps of:

- a) providing a ball with an exterior form, with an outside and an inside, surrounding an interior form with a compartment wherein the inside of the ball includes at least one space for containing animal treats and wherein the compartment includes at least one space for
20 containing animal treats;

- b) providing at least one opening in the interior form and at least one opening in the exterior form; and
- c) inserting animal treats in the ball.

23. The method of claim 22 further comprising the step of installing a removable
5 cap over the opening in the exterior form after inserting the animal treats.
